

## Description of Datasets:

**Case Report Form:** <https://data.cdc.gov/Global-Health/National-Artesunate-for-Severe-Malaria-Program-Cas/igaz-icki>

This dataset contains information on patient demographics, eligibility for treatment with artesunate, type of medication used as pre-antimalarial and follow-on treatment, pre and post artesunate labs, date treatment completed.

One row for each participant observation.

**Artesunate Dosing:** <https://data.cdc.gov/dataset/National-Artesunate-for-Severe-Malaria-Program-Art/qan4-gt4k>

This dataset contains information on the dosage, date and time of all recorded doses of artesunate administered to the patient.

There will be multiple observations for most participants.

**Follow-On Dosing:** <https://data.cdc.gov/Global-Health/National-Artesunate-for-Severe-Malaria-Program-Fol/g3k9-gyw7>

This dataset contains information on the dosage of follow-on antimalarials given to the participants after they received treatment with artesunate.

There may be multiple observations for each participant.

**Microscopy:** <https://data.cdc.gov/Global-Health/National-Artesunate-for-Severe-Malaria-Program-Mic/v2k9-ctv4>

This dataset contains information on the date and time of blood smears done, percent parasitemia and parasite species.

There may be multiple observations for each participant.
